

Date: 27<sup>th</sup> August 2023

Circular No: 030/YIS/AS/23-24/030

Dear Parents,

**Sub: Mission LIFE Program-Usage of Steel/Recyclable Items**

This is to inform you that the Government of India has launched ‘**Mission LIFE**’ an initiative, to bring individual behaviors at the forefront of the global climate action narrative. To make ‘**Mission LIFE**’ a people’s movement and create awareness at a global level, the Embassy of India in Riyadh is proposing a 11- point program to create awareness among children about environmental pollutants, the importance of a clean and hygienic environment, and the role of humans in keeping the earth healthy.

Therefore, to join hands with the movement, we shall be conducting a few activities in the school to create awareness among children about the importance of protecting our environment and inculcating environmentally friendly habits.

In addition to this, it is requested that all parents kindly ensure to provide **steel/recyclable plastic lunch boxes and water bottles** with students to school and be part of this initiative.

Together we can educate our children about the importance of a healthy environment. Let’s make a difference!

Warm Regards,

Mrs. Aasima Saleem  
Academic Principal
